About me

I am a digital designer with a strong interest in the intersection of technology, design, and user experience. My work spans UX, prototyping, programming, and AI. I am motivated by learning new technologies and quickly turning them into practical solutions. With experience in both design and development, I move naturally between user needs, visual concepts, and technical implementation. I take a curious, experimental, and analytical approach to creating digital products that are both useful and thoughtfully designed.

Education

2024/ 2026 **Masters Digital Design**
Aarhus University

2021/ 2024 **Bachelor Digital Design**
Aarhus University

2019/ 2016 **High School**
Fredericia Gymnasium

Experience

2023/ 2026 **Studentworker | Arts IT Helpdesk**
Aarhus University

At the Arts IT Helpdesk, I provided first-line IT support to both staff and students. The role involved close user contact, troubleshooting, and assistance with everyday IT issues. I also supported users with audiovisual equipment.

2025 **Internship | UX/UI designer**
JyskFynskeMedier

As an intern at JFM, I worked on developing a new mobile news experience in collaboration with Pugpig. The solution was designed to work across 16 media brands and bring together features such as personalisation, audio, podcasts, and live sports.

2021/ 2020 **Youth Mentor**
Fredericia Kommune

2020 **Subsistute Teacher**
Erritsø Fællesskole Afd. Krogsager

2019 **Special Needs Teaching Assistant**
Skrillingeskolen, Middelfart

Meet the AI assistant I built to answer questions about my skills, interests experience, and projects. Designed to help you see where I could fit into your team. It knows quite a lot about me, possibly more than I remember myself. Scan the QR code or visit to start a conversation and explore my online portfolio.
